Why Asbury Carbons?

- Availability** Ten manufacturing plants between U.S. and Canada which results in low freight costs. Twenty major warehouse locations coast-to-coast.
- Packaging** Asbury Carbons provides anode backfill products in 50 pound bags, 2500 lbs. per pallet, one ton super sacks, bulk or any other special packaging that is required by its customers.
- Quality** All of Asbury Carbons anode backfill products are made to strict specifications. Each of Asbury's ten manufacturing operations has its own quality control labs to constantly monitor our anode backfill products.
- Reliability** Asbury Carbons is a well established graphite and carbon company with proven excellence since 1895. Each shipment can be furnished with a no-charge "Report of Analysis" certifying particle size, resistivity and specially requested information.
- Variety** Asbury Carbons is the only supplier who supplies every type of anode backfill product currently available. Asbury Carbons even has a new anode backfill product called 4518 "Flo-Coke", which is superior in quality to calcined fluid coke which the industry has used for years.
